

VA Handoff: Ramos Roofing (Roofing Website + Lead System)

Client Overview

Field	Details
Business Name	Ramos Roofing (also styled "Ramos Roofing Plus")
Owner	Austin Ramos. Second-generation, family-owned business. Austin runs it with his father and plans to take over and scale the team.
Marketing Manager (main build contact)	Brandon. Handles day-to-day marketing and customer interactions, reviewed the demo, and signed off. Build direction and approvals come from him.
Industry	Roofing and all exterior work: siding, shingle, TPO, and metal roofs
Years in Business	25 years (established 2000)
Base	Fort Smith, AR (2001 S Z St)
Service Area	Northwest Arkansas, Oklahoma, and the entire Arkansas River Valley. Primary cities to rank in: Fort Smith and Bentonville.
Reputation	Strong, driven by word of mouth (especially after storms and hail), plus Facebook, Instagram, and door-to-door reps. This build is their first real website.
Domain	Owns <code>ramosroofingplus.com</code> (via Google Workspace / Squarespace). Onboarding form lists the desired domain as <code>ramosroofingplus.com</code> or <code>ramosroofings.com</code> . Confirm with Gozie which one to launch on.
Google Business Profile	Yes, they already have one. Gozie is being added as a manager to optimize it.
Hours	8 AM to 8 PM, plus 24-hour emergency service
Contacts	Brandon: (479) 652-1424 · Austin: (479) 221-8420 · Email: <code>austin.ramos5@gmail.com</code>
Assets	Google Drive folder " Ramos Roofing " (real job photos + drone footage, organized by product line): open folder . See Assets section for the full link.

What We Are Building

A full done-for-you lead system: a 20 to 30 page professional roofing and exterior-work website, an SMS chat widget, Google Business Profile optimization, an automated review system, and marketing automations inside the platform.

1. Professional Website (20 to 30 pages)

- **20+ individual service pages**, each aligned with the Google Business Profile so Google ranks them for each specific service instead of one generic "roofing" page. Cover their full scope: roofing, siding, shingle, TPO, and metal roofs, plus general exterior work.
- **Location pages** for the cities they serve across Northwest Arkansas, Oklahoma, and the Arkansas River Valley. Lead with Fort Smith and Bentonville.
- **AEO (Answer Engine Optimization)**: an FAQ section on each service page so the site can rank in ChatGPT answers and Google's "People Also Ask."
- Positioning note: competitors build 5 to 10 page sites. Ours is 20 to 30 with individual service and location pages. That depth is the differentiator, build it out.

2. Homepage (specific client requests)

- **Hero video**: a looping background video of their workers on a roof. Use the drone footage in the Drive folder (see Assets).
- **Intro video slot (future)**: leave a placeholder block on the homepage for a short video of Austin and Brandon saying "This is Ramos Roofing, 25+ years experience, click here for a free estimate." They will film and send it later.
- **Promotional banner system**: an easy-to-edit header banner for limited-time promos, for example "Ribbon cutting event on [date]" or "10% off your roof, click here." It needs to be quick to swap out.
- Prominent **"Free Estimate"** call to action.

3. Before/After Product Comparison Page (very specific)

This was one of his most detailed asks. Build a **dedicated page**, not a single generic slider.

- **Separate before/after sliders for each roofing product type**: Titan XT (metal), Malarkey, TPO, metal, and the various shingle types, all on one page.
- Each slider gets a **mini caption** naming the product and describing the differences between the shingle types.

- The client has a **PDF comparing shingle types** that he sends to customers. Pull that content onto this page. Get the PDF from Brandon.
- Call out the **rare shingle colors** customers ask about: blue, green, red.
- Product lines confirmed from their Drive assets: **Malarkey Bella Vista Class 4, TAMCO Titan XT** (Rustic Black and Painted Desert), **Tamco Heritage Shingles**, and general metal roofing.

4. About Us Page

- Their story: second-generation, family-owned, 25 years (established 2000), reputation built on word of mouth, serving Northwest Arkansas, Oklahoma, and the Arkansas River Valley.
- **Supplier certification badges/logos:** SRS, QXO, and ABC (the material warehouses they source from). Get the logos from Brandon.

5. SMS Chat Widget

- **Use the SMS widget, not an AI chatbot.** The client agreed to SMS after Gozie explained it converts better because it captures lead info instead of just answering questions.
- Captures the visitor's **name, phone number, and inquiry**, then routes the message straight to the phone via SMS ("This text goes straight to my phone").
- **Route notifications to Brandon** at (479) 652-1424, not the owner. The client specifically asked for this so leads go to the marketing rep.

6. Google Business Profile Optimization

- They already have a Google Business Profile and a Google Workspace domain under the Ramos Roofing name. Gozie is being added as a manager and will text over any needed credentials.
- Optimize the GBP and mirror the website's service pages to the listing so Google connects the two.

7. Automated Review System

- Review landing page with a **star-rating filter:** 4 to 5 stars redirect to the Google Business Profile; 1 to 3 stars go to a private internal feedback form (routed to the owner's phone) so lower ratings are caught before they go public.
- **QR code** for on-site use right after a job is completed.
- Target cadence to aim for: 3 to 5 reviews per week.

8. Marketing Automations (inside the platform)

Campaign	What it does
Review Campaign	Auto-text after job completion: "Leave a review, get 10% off next service."
Past-Customer Discount	Re-engage customers from 3 to 6 months ago with a 10% discount offer.
Referral + Review (combined, per client request)	Client wants these merged into one: "Refer someone, get a \$300 to \$500 check plus 10% off next service." The check pays out on a referred, completed roof job.
Storm-Trigger Blast	Client texts Gozie when a storm hits, then we blast their past-client list: "Storm damage? Here's 10% off roof repair."

- All campaign messaging is fully customizable. Keep the copy easy to edit; the client will text the exact wording he wants.
- Heads up: they already offer 5 to 10 year warranties, so the "10% off next time" messaging must not clash with work that is already warranty-covered. Keep the wording flexible.

Assets (Google Drive)

The client uploaded real assets to the shared "**Ramos Roofing**" Drive folder, organized into subfolders by product line. Link: <https://drive.google.com/drive/folders/1KQpet-AHgs1ImK7aDEfNbLyuEcuYvDub>

- Malarkey Bella Vista Class 4
- Rustic Black Tamco Titan XT
- Painted Desert Tamco Titan XT
- Tamco Heritage Shingles
- Metal Roof
- Pictures of finished products

These hold real job photos (JPEG/HEIC) plus drone footage (MP4/MOV) to use for the hero video and the before/after page. Convert HEIC images to JPG/WebP for the web. Still to come from Brandon: the shingle comparison PDF, the SRS/QXO/ABC supplier logos, and the GBP credentials.

Special Requirements

CLAIMS: Only list the supplier certifications the client actually provides (SRS, QXO, ABC). Do not invent certifications, warranty terms, or credentials. If a logo or detail is missing, leave a clean placeholder and flag it for Gozie.

Action Items for VA

1. Build the **homepage**: looping roof drone-footage hero video, prominent "Free Estimate" CTA, an easy-to-edit promo banner slot, and a placeholder block for the future Austin/Brandon intro video.
2. Build **20+ individual service pages** (roofing, siding, shingle, TPO, metal, exterior work) plus location pages for Fort Smith, Bentonville, and the surrounding Northwest Arkansas / Oklahoma / Arkansas River Valley cities, each with an FAQ section (AEO), aligned to the GBP service list.
3. Build the dedicated **Before/After page** with a separate slider per product type (Titan XT, Malarkey, TPO, metal, shingle types), each with a caption naming the product and describing the differences. Pull copy from the client's shingle comparison PDF and call out the rare colors (blue, green, red).
4. Build the **About Us page**: the second-generation, 25-year story, the Northwest Arkansas / Oklahoma / Arkansas River Valley service area, and supplier certification badges (SRS, QXO, ABC).
5. Install the **SMS chat widget** (captures name, phone, inquiry) and route notifications to **Brandon at (479) 652-1424**. Do not use an AI chatbot.
6. Build the **review system**: star-filter landing page (4 to 5 stars to Google, 1 to 3 stars to an internal form) plus a QR code.
7. Set up the **automations** in the platform: Review, Past-Customer Discount, the combined Referral + Review (\$300 to \$500 check + 10% off), and the storm-trigger blast. Keep all copy easy to edit.
8. Use the **real photos and drone footage** from the "Ramos Roofing" Drive folder throughout the site, organized by product line. Convert HEIC files to web format.
9. Send the site to **Gozie for review** before anything goes to the client.

Appendix: GHL Reference (Notes + Forms)

Pulled directly from the Ramos Roofing records in GoHighLevel. This is the raw source behind the brief above. Read it before starting the build.

A. Contact Records

Field	Brandon (onboarding)	Austin (funnel lead)
Name	Brandon	Austin Ramos
Company	Ramos Roofing +	Ramos Roofing Plus
Phone	(479) 652-1424	(479) 221-8420
Email	austin.amos5@gmail.com	austin.amos5@icloud.com
City	Fort Smith / Bentonville	Fort Smith, Arkansas
Tag	client-onboarding	funnel quiz lead
Added	July 3, 2026	July 2, 2026

B. Website Onboarding Form (submitted by Brandon)

Exact answers as submitted.

Question	Answer
Official Business / Company	Ramos Roofing +
Business Email	austin.amos5@gmail.com
Business Phone Number	(479) 652-1424
Business or Home Address	2001 S Z St, Fort Smith
Primary City to Rank In	Fort Smith, Bentonville
Service Areas	Northwest Arkansas, Oklahoma, all of Arkansas River Valley

Full List of Services	Roofing and all exterior work including siding and shingle, TPO and metal roofs
Year Established	2000
Business Hours	24hr emergency and 8am to 8pm
Do you have an existing website?	No
Do you have an existing Google Business Profile?	Yes
Desired Website Domain	ramosroofingplus.com or ramosroofings.com (written as "Ramosroofingplus.con")

Note: brand colors, logo, trust badges, and design-reference fields were left blank on this form. Design direction comes from the call notes below (hero video, before/after page, promo banners, supplier badges). Confirm brand colors with Brandon.

C. Funnel Quiz (submitted by Austin)

Qualifier answers, useful context on the size of the business.

Question	Answer
What kind of business do you run?	Contracting Business
How many crews do you have?	6+ crews
What is your current monthly revenue?	\$0 to \$10,000
How much do you spend on marketing per month?	Up to \$1k
How soon do you want more jobs coming in?	ASAP / right now

D. Call Note 1: Discovery Call (Austin)

Meeting Overview

Sales and discovery call between Gozie (the marketing provider) and a representative from Ramos Roofing, a second-generation, family-owned roofing and exterior-work company that has been in business for 25 years. They service all of Arkansas and Oklahoma.

Current Business State and Pain Points

- **Current marketing:** Facebook, Instagram, door-to-door salesmen, and word of mouth. Word of mouth is their strongest driver, especially following storms or hail, but they want to expand and stand out against local competition.
- **Online presence:** They do not currently have a functioning website. They own a domain (ramosroofingplus.com, hosted via Google Workspace / Squarespace) and have a Google Business Profile, but they don't know how to properly manage or connect them.
- **Company structure:** The prospect and his father currently run the business. Brandon handles most of the day-to-day marketing and customer interactions. The prospect plans to take over and hire more reps as the company scales.

Gozie's Proposed Solution

A comprehensive done-for-you digital marketing and lead-generation system tailored for high-ticket contractors:

1. **Custom SEO-optimized website:** a 20+ page custom website (not a generic 5-page template) with individual pages for each specific service and each targeted city/location. AI ranking (AEO): deep FAQ sections across the site so AI search engines pull their business as the top answer when locals ask roofing questions.
2. **Instant SMS lead routing:** website forms and a custom chat widget route all inquiries to the contractor's phone via text so no leads fall through the cracks. Configure notifications to go directly to Brandon (the marketing rep) instead of bothering the owner.
3. **Review management and filtering:** if a customer selects 4 or 5 stars they are pushed to the live Google Business Profile; if they select 1 to 3 stars they are redirected to a private feedback form that goes straight to the owner's phone, keeping bad reviews from going public.
4. **Automated campaigns:** review campaigns (10% discount for a review), past-customer reactivation (re-engage old customers months after a job), and a referral program (past customers get a \$300 to \$500 check if they refer a new, completed roof job).

Next Steps and Action Items (from the discovery call)

- The prospect was very receptive but needed to discuss the investment with his father and Brandon.
- **Follow-up call:** scheduled for Monday at 6:00 PM.
- **Gozie's deliverables:** send a 10-second tutorial video showing how to add him as a manager on their Google Business Profile; send a portfolio of past websites; tentatively put together a rough preview/mock-up of their new website before Monday to help convince the father.
- **Prospect's deliverables:** provide Brandon's phone number so Gozie can text him directly; bring the father and Brandon to the Monday evening call to finalize the deal.

This is the earlier discovery call. The July 7 closing call below supersedes these next-steps; kept here for context.

E. Call Note 2: Sales / Closing Call, July 7 (Brandon)

Date: July 7, 2026 (1:34 PM). Duration: about 39 minutes. Participants: Gozie Okenu (Okenu Marketing) and the Ramos Roofing operations/marketing lead (Brandon), referred by Austin.

Context and Background

- Austin (Ramos Roofing sales rep) had a prior call with Gozie pitching the digital marketing services, then connected him with Brandon, who runs all marketing and dispatches specialists for Ramos Roofing.
- Brandon was driving during the call and joined from his car. He apologized for missing a meeting the day before (July 4th weekend, his parents surprised him with a visit in Austin, TX).
- He already reviewed the demo website and came in warm, ready to buy.

Service Offer Recap (what Gozie presented)

- **1. Professional Website (20 to 30 pages):** 20+ individual service pages, each aligned with the Google Business Profile for SEO; AEO with FAQ sections on each service page to rank on ChatGPT and Google's "People Also Ask." Differentiator: other agencies build 5 to 10 page websites; Gozie builds 20 to 30 with individual service and location pages.
- **2. SMS Chat Widget:** replaces the AI chatbot approach (AI chat answers questions but fails to capture lead info). The SMS widget shows "This text goes straight to my phone," which

converts better. Gozie showed an old contractor site still on the AI receptionist that he is migrating to SMS as well.

- **3. Google Business Profile Optimization:** client confirmed they have a Google Workspace domain under the Ramos Roofing name; Gozie will get access credentials and optimize the GBP.
- **4. Automated Review System:** review landing page with a star-rating filter (4 to 5 stars to the Google Business Profile; lower ratings to an internal feedback form); QR code for on-site use after jobs. Gozie recommended 3 to 5 reviews per week as the sweet spot.
- **5. Marketing Automations (via the software):** Review Campaign ("leave a review, get 10% off next service"), Past-Customer Discount (re-engage 3 to 6 months later with 10% off), Referral Campaign ("refer a friend, you get 15% off, they get a discount too"), and a storm-triggered blast (client texts when a storm hits, Gozie blasts the past-client list with "Storm damage? Here's 10% off roof repair"). All messaging is fully customizable.

Client's Specific Requests and Customizations

The client came with very detailed, specific asks. This is not a passive buyer.

Website feature requests

1. **Hero video on homepage:** looping background video of their workers on a roof (they have drone footage ready to send).
2. **Before/After sliders by product category:** not one generic slider. Separate before/after sliders for each roofing product type (Titan XT, Malarkey, TPO, metal, various shingle types), all on one dedicated page. Each slider needs a mini caption identifying the product and describing the differences between shingle types. He already has a PDF comparing shingle types that he sends to clients and wants that info on the site. He noted rare shingle colors (blue, green, red) that customers ask about.
3. **About Us page with supplier certifications:** logos/badges for certified suppliers SRS, QXO, ABC (material warehouses they source from).
4. **Intro video (future):** plans to film himself and Austin doing a quick "This is Ramos Roofing, 25+ years experience, click here for a free estimate" video for the homepage.
5. **Promotional banners:** ability to quickly add limited-time header promotions ("Ribbon cutting event on [date]" or "10% off your roof, click here").
6. **SMS widget preference confirmed:** he initially asked about the chat auto-categorizing jobs, but after Gozie explained SMS vs. AI conversion rates, he agreed to SMS.

Automation customization

- He wants to combine the referral and review campaigns into one: "Refer someone, get a \$300 to \$500 check plus 10% off next service."
- They already offer 5 to 10 year warranties, so the "10% off next time" messaging needs to account for the fact that warranty work is already covered.
- All messaging is fully customizable.

Content and Asset Exchange Process (Agreed)

Asset	Method
Photos and videos	Upload to the Google Drive link (Gozie sends after call)
Business info and services	Fill out the website intake form (Gozie sends after call)
GBP credentials	Text directly to Gozie
Future photo/video updates	Upload to Drive, text Gozie, updated within 24 hours
Quick promotional changes	Text Gozie, done within the hour
Large multi-page photo swaps	Up to 24 hours

Gozie asked him to organize the Google Drive with folders (before/after separated by project).

Follow-Up Meetings Scheduled

1. Website walkthrough call with the client before launch.
2. Monthly recurring: client requested once-a-month check-in calls to discuss website updates, new ideas, and strategy.

Rapport and Miscellany

- Client noticed Gozie's Meta glasses content on Facebook and asked how he likes recording with them (Gozie said they are solid, about \$250 to \$300).
- Gozie mentioned potentially doing a "website transformation series" featuring Ramos Roofing's site build.
- Client offered to let Gozie use their page for content too; mutual content collaboration discussed.
- Gym talk: both lift regularly; client mentioned Austin posts more fitness content than roofing content.

- They were opening Pokemon cards with a supplier friend during lunch; call ended on a casual note.
- Client invited Gozie and Austin to fly out to Texas for BBQ.
